8. You will be asked to use your current location. This will allow us to monitor certain statistics which help us improve our services. Press OK

If your iPad location services are already turned on your app will continue to download. If not, iPad setting menu will open to Location Services and you will be asked to turn current location on.

PLEASE NOTE: It will take anywhere from 15 to 30 minutes to download the app. During that time, refrain from using your iPad to ensure proper download.

You will see a status bar at the top of the app as the download progresses. Once that status bar has disappeared, you may start using the app.
